Twitter confirms zero-day used to expose data of 5.4 million accounts

By [Lawrence Abrams](#)

August 5, 2022

12:00 PM

0

Twitter has confirmed a recent data breach was caused by a now-patched zero-day vulnerability used to link email addresses and phone numbers to users' accounts, allowing a threat actor to compile a list of 5.4 million user account profiles.

‘Massive’ cyberattack hits German Chambers of Industry and Commerce

The email and website of the German Chambers of Industry and Commerce (DIHK) – an organization representing millions of businesses – are still down as it tries to recover from a cyberattack that began on Thursday.

Damaged Earth Catalog

Purpose

We are humans and might as well get used to it. So far, remotely done power and glory—as via government, big business, formal education, church—has succeeded to the point where gross profits obscure actual loss. In response to this dilemma and to these losses a realm of intimate, community power is developing—power of communities to conduct their own education, find their own inspiration, shape their own environment, and share their knowledge with others. Practices that aid this process are sought and promoted by the DAMAGED EARTH CATALOG.

Welcome to the Permacomputing wiki!

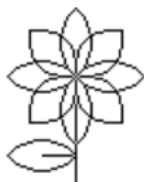

What is this?

Wiki

Started in May 2022, this [wiki](#) is about [permacomputing](#), a radically sustainable approach to [computing](#) inspired by [permaculture](#), with a focus on utilizing already available computational resources.

The wiki is still at a very early stage of development, we don't know yet what permacomputing can be or could be. We need your help, specially if you have expertise in ecology, environmentalism and computer/net technology. If you want to contribute, please contact us for [editing](#) privileges.

This main page of the wiki is an index to the various topics covered. See "[about](#)" for a more detailed discussion about the wiki itself.

How to Build a Practical Household Bike Generator

We built a pedal-powered generator and controller, which is practical to use as an energy source and exercise machine in a household — and which you can integrate into a solar PV system. We provide detailed plans to build your own, using basic skills and common hand tools.

Web3 Generation of Inspiring Leaders — Who Are They?

Crypto Daily™ · 5 days ago

aliceyuanzhang.com/decentralization

Alice Yuan Zhang

Unpacking the Myth of Web3: Decentralization of What?

Under the rule of exploitative tech giants and surveillance states, the term “decentralization” has surfaced as a lightning rod of kaleidoscopic alternatives. This transitional moment is as dangerous as it is powerful: mass exasperation without clear values becomes easy target for new forms of oppression to further entrench us into capitalist logic and colonialist legacy. With no interest in pseudo-solutions, we must ask ourselves: will the proposition of Web3 lay fertile ground for the liberation we need and deserve, or libertarianism with a borrowed tongue?

Community Technology

During my years as the Director of the Detroit Community Technology Project I wrote this handbook as a way of archiving 8+ years of knowledge gained from teaching communities technology in Detroit.

This 100+ page handbook will take you through the history of popular education while offering a step-by-step guide to developing community rooted technology workshops and curricula. The handbook introduces Community Technology as a series of educational practices, combining theories and methods by Paulo

Blockchain Chicken Farm

And Other Stories of Tech in China's Countryside

By Xiaowei R. Wang

From FSGO x *Logic*: stories about rural China, food, and tech that reveal new truths about the globalized world

In *Blockchain Chicken Farm*, the technologist and writer Xiaowei Wang explores the political and social entanglements of technology in rural China. Their discoveries force them to challenge the standard idea that rural culture and people are backward, conservative, and intolerant. Instead, they find that rural China has not only adapted to rapid globalization but has actually innovated the technology we all use today. From pork farmers using AI to produce the perfect pig, to disruptive luxury counterfeits and the political intersections of e-commerce villages, Wang unravels the ties between globalization, technology, agriculture, and commerce in unprecedented

Walk of Fame - Back to South

08 Jul 2022

On April 4, 2022, after 32 years of existence, the Rotterdam Walk of Fame came to an end. The last sixty tiles of the well-known star sidewalk at the Metroplein in Ahoy were dismantled. Since then, Rotterdam has been one point of interest poorer. Fortunately, we managed to get hold of one of the special tiles. On July 8, at the beginning of the summer holidays, the tile of none other than Shrek will be replaced on the corner of Gouwstraat and Wolphaertstraat. Everyone is welcome at the green unveiling at 7 p.m. sharp. There will be snacks, drinks and music. → [read more](#)

Wheat District Granary: Documenta 15 for-before-preview

03 Jun 2022

You may have heard it already: a number of Rotterdam artists and hackers are working on projects related to documenta 15. The projects were created in collaboration with ruangrupa, the artists' collective from Jakarta (Indonesia) that is in charge of this year's artistic direction. As documenta gets closer and closer, we organize a moment to eat together, share what we have been working on lately and discuss it further over a drink. Or we dive together into the local ekosistem voice. → [read more](#)

Guide To Serving A Website From A ...

Guide To Serving A Website From A Raspberry Pi

two main methods in this guide:

1. with yunohost
2. manually

with yunohost

First to explain with yunohost.

Yunohost already has some really extensive documentation.

Here is a guide for installing yunohost on a raspberry pi:

<https://yunohost.org/en/install/hardware:rpi2plus>

... if you end up trying this and run into any gotchas, feel free to message

... in particular Dynamic DNS may be tricky

once yunohost is installed,

go to domain -> add new domain (use your own domain you choose for this website, which you need to have registered with a dns provider)

go to applications -> install -> custom web application

associate the web application with the domain.

you can then upload your static website (explained more below), and yunohost will serve the website at that domain,

and on your local network using whatever your pi's IP address is.

these instructions are super short, and clearly need to be fleshed out, with screenshots etc. for a real guide, but I'm just starting with this lil outline.
