The future must be ours to shape.

Facial recognition can and will be used against each of us by governments and corporations - based on who we are and what we look like.

## INTERNET, MON AMOUR

## INTERNET, MON AMOUR

*"New technologies offer us the possibility of not having to choose. Isn't it fantastic?" ...*

A group of hackers, artists, geeks escape the *Great Internet Plague*. In a remote place within the Alpine valleys, off the radar and off the drone, they tell stories from before the catastrophe, to keep each other company.

This book is the faithful account of those stories, shared over five days: *away from home, relationships, sex, frauds and a final recreation.*
